

## Citrix® NFuse™ Elite.

The *simple, powerful access portal server* providing secure aggregation of *applications and information*.

### Customizing portal pages.

Content Delivery Agents (CDAs) are Web-based services that deliver internal and external content to the portal desktop. CDAs in Citrix® NFuse™ Elite will include:

- Alert Broadcaster
- Calendar
- Database Viewer
- eMail
- Instant Messaging
- Interactive Poll
- Internal Search
- Message Center
- News Viewer
- Citrix NFuse Classic Application Launcher
- Online Auctions
- Personnel Locator
- Shared Documents
- Shopping Center
- Stock Tracker
- Travel Planner
- Weather Snapshot
- Web Favorites
- Website Viewer
- World Clock

The amount of information driving business decisions continues to expand, while the number of hours in the day remains the same. Therefore it is critical for employees to have instant access to the information they need to do their jobs. When it comes to aggregating and presenting role-oriented information and applications in a personalized way, an access portal becomes the logical solution.

The goal of the new Citrix access portal server, Citrix® NFuse™ Elite, is to get the right information to the right user at the right time. Citrix NFuse Elite access portal server aggregates and personalizes information and applications, delivers them through a secure browser interface and allows user interaction—from anywhere at any time. The immediate availability of meaningful information, presented the way users want to see it, results in smarter and faster decision making and, ultimately, a more responsive, productive and competitive organization.

Citrix NFuse Elite is part of a new access portal server product line that will deliver the virtual workplace to Citrix customers. By leveraging the power of Citrix NFuse™ Classic to enable Web-based access to Citrix MetaFrame® applications, Citrix NFuse Elite expands beyond client-server systems to include access to Web-based applications, legacy applications, internal and external content, and other services, such as syndicated content feeds.

Citrix NFuse Elite access portal server can move an organization decisively toward realizing its Web strategy. Now organizations of all kinds and sizes can take even greater advantage of the virtual workplace, with its ability to provide simple, powerful access to any application and information from any device over any connection.

### Simple.

For an access portal solution to work effectively in an organization, it must be simple and intuitive for users and administrators.

Citrix NFuse Elite access portal server makes it simple for users to gain secure access to the applications and information that enhance productivity. By using a familiar browser interface, Citrix NFuse Elite provides point-and-click access to internal and external content and published applications. Users can also easily personalize their portal desktops according to their preferences.

For administrators, Citrix NFuse Elite will provide an installation wizard with pre-configured elements that facilitate portal setup. Administrators can deploy a portal that quickly meets user requirements without the need for long-term consulting or highly specialized staffing. And the Portal Management Console allows the administrator to manage the entire portal using a centralized tool with wizard-driven assistance for common tasks.

### Powerful.

Powerful content aggregation and information access features enable Citrix NFuse Elite access portal server to increase productivity and deliver return on investment.

Citrix NFuse Elite enhances communication and delivers information where it is needed according to user roles. Combined with the aggregation of a wide range of internal and external content in a single location, Citrix NFuse Elite enables users to leverage this personalized information to boost productivity, foster innovation and increase profitability.

Citrix NFuse Elite provides secure access to information and applications by supporting Active Directory™ and Windows NT® authentication to validate credentials. Additional role-based security features help ensure that users gain access only to information that they are authorized to see and applications they are authorized to use.

With a low initial cost and rapid deployment, Citrix NFuse Elite access portal server can enable a quick return on investment for an organization's access portal initiatives. And since a portal makes it easy for users to gain access to a broader scope of organizational resources, existing IT investments can be used by more people—in more ways—than ever before.

### Access.

Product and partner solutions allow Citrix NFuse Elite access portal server to save time and reduce frustration by giving users access to key information and applications from anywhere.

Through seamless integration with Citrix MetaFrame, Citrix NFuse Elite makes it easy to deploy Windows®, legacy and client-server applications via the Web. Comprehensive alliances with industry leaders in collaboration, content management and application integration solutions will extend the portal to meet future growth needs.

By supporting remote office locations and a variety of devices, Citrix NFuse Elite delivers content and applications wherever and whenever they are needed.

As an established world leader in application serving technology, Citrix has years of experience making products that help organizations work more efficiently and productively. With the introduction of the Citrix NFuse Elite access portal server, Citrix is continuing to provide products that work seamlessly together to make the virtual workplace a reality...today and tomorrow.

Put the simple, powerful access portal server—Citrix NFuse Elite—to work for your organization. For more information, visit [www.citrix.com/nfuse\\_elite](http://www.citrix.com/nfuse_elite)

## About Citrix

- Founded in 1989, Citrix Systems, Inc. (Nasdaq: CTRS) is a leader in virtual workplace software and services. Citrix makes the virtual workplace real by providing access to applications, information, processes and people—on any device, over any network, anywhere, anytime.
- Citrix solves access-related problems by delivering a suite of software products and services that extend access from any device, over any network to any application or information source.
